SOMOS ITBA

- Más de 60 años formando profesionales bajo los valores de la innovación, la creatividad, el espíritu emprendedor y el liderazgo.
- Persigue un modelo educativo único en el país orientado a la investigación y a la generación de proyectos, junto con la conexión temprana de los alumnos con las empresas.
- Su oferta académica se estructura dentro de la Escuela de Gestión y Tecnología y la Escuela de Innovación. Ofrece 11 carreras de grado, 12 carreras de posgrado, 3 doctorados y más de 70 programas ejecutivos.

ESCUELA DE INNOVACIÓN

Comprometida con el desarrollo de los individuos y organizaciones, la Escuela de Innovación promueve un entorno colaborativo, flexible y dinámico capaz de responder a los desafíos tecnológicos y a las nuevas demandas del mercado

ORGANIZACIÓN DE LA ESCUELA DE INNOVACIÓN

EDUCACIÓN EJECUTIVA

Brindamos propuestas formativas en diferentes áreas temáticas con el objetivo de potenciar el desarrollo de habilidades y competencias necesarias para realizar los trabajos del futuro.

WHY ARGENTINA WHY BUENOS AIRES

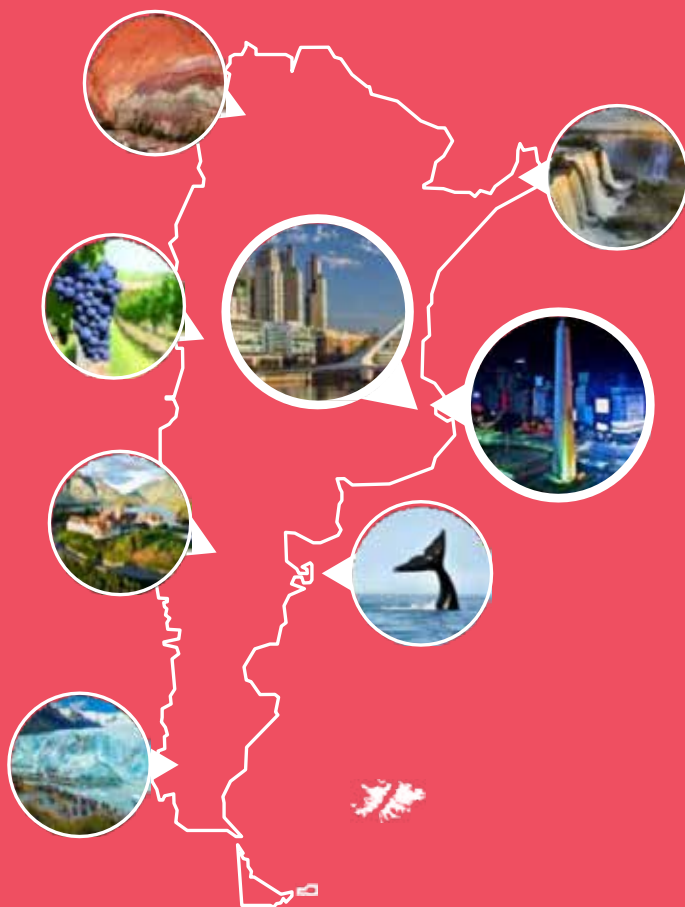

ARGENTINA IS RECOGNIZED FOR

- Its professional and entrepreneurial talents.
- Its developments in agriculture and energy, programming and sustainability.
- Its cultural offering, day and night life.

**CALLED "THE PARIS OF
SOUTH AMERICA" BUENOS
AIRES IS THE CITY THAT
NEVER SLEEPS.**

**Buenos Aires offers all
kind of experiences for
its visitors.**

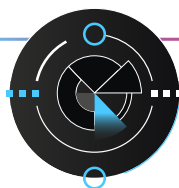

Its monuments, parks, squares, coffee stores, museums, bookstores and theaters, together with its vibrant energy and its great climate, make the city an unbeatable place for anyone.

Buenos Aires has become one of the favorite destinations for students from all over the world.

SUMMER AND WINTER OFFER

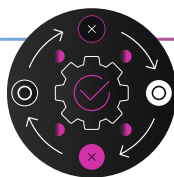

DATA ANALYTICS

Live / Summer & winter

The program covers the transactional and multidimensional databases, which are fundamental to provide adequate data support to any IT project. It seeks to offer the necessary knowledge in order to implement database systems that respond to the requirements of the project that aims to impact.

[SEE MORE](#)

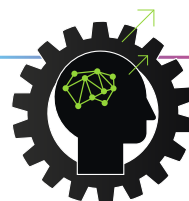

APPLIED MECHANICS

Live / Winter

The program aims to integrate design, calculation and manufacturing into mechanical design using Computer Aided Design, Computer Aided Engineering and Computer Aided Manufacturing to complete a design process of an industrial component. Computer Labs and Workshops are used throughout the course.

[SEE MORE](#)

PHYSICS II

Live / Summer

The program aims to present the main physical foundations, an introduction to Electricity and Magnetism, Geometric and Physical Optics, and how they formulate the various physical models that explain them, their underlying hypotheses and the limits for their application, which serve as a basis for subsequent courses in this discipline, as well as others that relate to them.

THE ENERGY CHALLENGE ZERO EMISSIONS BY 2050

Live / Summer & Winter

The program provides discussions on the key factors and issues associated with the energy transition required to reach zero GHG emissions. The four energy value chains: power generation, transportation fuels, industrial energy and residential energy will be analyzed and discussed.

[SEE MORE](#)

DIGITAL MANUFACTURING

Live / Summer & Winter

This workshop is designed to learn and experience hands on all the steps prior to the industrialization of a product: modeling, prototyping, defining materials, components and processes.

[SEE MORE](#)

OPERATION RESEARCH & SIMULATION

Live / Summer & Winter

The program is designed to provide students with theoretical and practical tools for solving operations research and optimization problems related to industrial engineering. Beginning with mathematical modeling and evolving to simulation, this program gives the basics to understand the structure of systems and to identify the opportunities for optimization.
